

Android TV / Google TV

Crestron Home | 0.1.14 Public Beta

Find the drivers in Home Setup

Add **Drivers > Streaming Player > Android TV > Android TV Remote v2**. Enter the box IP and enter a unique Box ID for each box in Installer Settings. Make up your own ID, such as KITCHEN-TV. No spaces. Finish video routing. Use a DHCP reservation or static IP address for the box.

Add **Drivers > Utility > Titan Technology > Titan Pairing Utility** on the same processor.

Expected compatible devices

Google TV Streamer (4K); Chromecast with Google TV (HD and 4K); NVIDIA SHIELD TV and SHIELD TV Pro; Xiaomi TV Box S (2nd and 3rd Gen), Mi Box S and TV Stick 4K.

Pair the box

Open Titan Pairing Utility in the Home app. Select **Android** or **All**, tap **Refresh boxes**, and choose the box. Show it on the TV, tap **Start pairing**, enter the six-character TV code, then tap **Pair**. Wait for **Paired** and test the source controls.

Launch apps from Quick Actions

In Home Setup Quick Action programming, select the driver, open **Launch Apps**, and choose the app. The app must be installed to work.

Trial

14-day trial. Restarts if you reboot the processor.
